

# HexTwist™

An Ergonomic Device for Hex Application and Removal

## ■ Features

- Motorized, easy to use
- Stainless steel & Teflon sockets
- Reverse and forward switch
- Classical and High Capacity columns

HexTwist™ is a motorized hex applicator and removal device which is used for insertion and removal of hex fitting used in Power-Prep disposable columns.

The internal torque setting allows proper torque setting suitable for classical as well as high capacity columns. The material contacting columns are made of Teflon and stainless and easily cleaned.
